

Japanese Laid-Open Utility Model Publication No. 63-47330

Date of Publication: March 31, 1988

Date of Filing: September 16, 1985

Application No. 61-141509

Applicant: Stanley Denki Kabushiki Kaisha

Creator: Toshiyuki Terada et al.

As shown in the drawings, a liquid crystal display has a frame 1 accommodating a liquid crystal panel 2, a light guide 3, and a light source 4. The light guide 3 includes an ambient light collecting portion 3a connected to an opening 1a or 6a in the frame 1 directly or by means of an extension member 7. The ambient light collecting portion 3a includes a liquid crystal shutter 8, which is driven by a light receiving sensor 9 located near the opening. The light receiving sensor 9 is a solar cell.
